Precision Actuation for Industry

Mid Range Electric Actuators for Valves and Dampers

P6-24N4-AC Proportional Electric Actuator for industrial valves and dampers

P7-230N4 Industrial Quarter-Turn Electric Actuator

P8-120N4-TS with Torque Switch, Local Control Center and optional linkage

ProMation Engineering stocks and ships 6,000 through 13,000 in lbs actuators every day.

When we at ProMation Engineering received feedback that our customers truly value in-stock availability and fast shipping, we listened. We now stock more of our most popular actuators and regularly ship products the same day.

Advantages:

- 12VAC/DC, 24VAC/DC, 120VAC, 230VAC supply voltages and 3 phase applications*.
- NEMA 4X environmental rating
- Raised indicators clearly show actuator position

* Not all voltages are available with all options.

Failsafe Options Available: Power Backup Units provide backup power for positive positioning in critical situations. Available in most voltage, On/Off/Jog or Proportional Units.

Versatile: Nearly every actuator we offer can be custom engineered to match your specifications, from Local Control Stations to Cold Weather Heaters.

- On/Off/Jog functionality or Optional Proportional Control
- Torque Switches
- Cold weather kits (for operation to -40° F/C)
- Local control stations
- Battery Back-up

Custom engineering for a wide array of flexible solutions to meet your application requirements

More information about the rugged P Series Quarter Turn Electric Actuators can be found at www.promationei.com.
